

ptaglobal *Advanced*

What is the PTA Global Advanced Course?

The Advanced Course is for the trainer who has successfully completed the PTAG Certification or Bridging course. This course takes the concepts learned in our certification and bridging and expands them into truly advanced *applicable* tools. It is the view here to understand both human movement and, more importantly, that which drives it, through a holistic lens of observation. You will explore how your clients are put together, move, and communicate, and how to better give them what they need through integrated solutions.

The Advanced Course is the final step before you get to fully explore your own unique passion and purpose along the Career Pathway. This will prepare you to become a leader at what you do, capable of positively impacting on the quality of life of those you work with, by *meeting them where they need to be met*.

What is the content?

- Movement Based Observation
- Advanced Functional Anatomy
- Functional Biomechanics
- Daily Readiness Observation model (mental, physical and lifestyle)
- Multi sensory communication
- Author interviews

What do you get?

- **Accompanying test book – Anatomy Trains**
- **Free access to PTA Global Community**
- **Free preparation exams and online exam**
- **One day live workshop**

What do you do now?

For more information on what's in the Advanced Course or to sign up visit www.ptaglobal.com or contact info@ptaglobal.com

The PTAG Advanced Course is the course for the trainer of today; wanting to lead, inspire and make a change in the lives of those they work with. The trainer that puts the *client* first!
